ACKNOWLEDGEMENT

The satisfaction and euphoria that accompany the successful completion of any task would be incomplete without the mention of the people who made it possible, whose constant guidance and encouragement crowned our effort with success.

We are grateful to our institution, **Global Academy of Technology**, with its ideals and inspirations for having provided us with the facilities, which has made this project a success.

We earnestly thank **Dr. Rana Pratap Reddy, Principal, Global Academy of Technology** for facilitating academic excellence in the college and providing us with the congenial environment to work in, that helped us in completing this project.

We wish to extend our profound thanks to **Dr. Kiran Y C, Prof. and Head, Department of Information Science & Engineering, GAT**, for giving us the consent to carry out this project.

We would like to express our sincere thanks to our guide **Deepthi VS, Assistant Professor, Department of Information Science & Engineering, GAT**, for her able guidance and valuable advice at every stage, which helped us in the successful completion of the project.

We would like to thank all the teaching and non-teaching staff for their valuable advice and support.

We would like to express our sincere thanks to our parents and friends for their support.

ABSTRACT

Clock is an android application that replaces the regular system clock with several time zones of your choice. Knowing the time around the world has never been simpler. Whether you are an enterprise in need of an efficient time zone monitoring utility, or a home user with a loved-one in another country, or stock and currency trader, this clock is software you should not be without.

World Clock allows to display the current time and date in locations of your choice in 24-hour format and date. It includes a stopwatch which can be used to note time span of different activities where the time is noted in 6-digit format, that is, Hr: Mn: Sc. The stopwatch can run for hours.

It also includes a timer where the user is allowed to set the timer in minutes. Once the timer expires a message is displayed indicating the same.
